

Radiologic Technology Program

Mission Statement, Goals and Student Learning Outcomes

Program Mission:

To prepare people for success in the healthcare field as competent entry level radiographers.

Program Goals:

Students will be clinically competent.

Student Learning Outcomes:

- Students will accurately position patients for radiographic exams.
- Students will simulate exams for evaluation of continued skill and retention.
- Students will use proper radiation protection during radiographic procedures.

Students will demonstrate effective communication skills.

Student Learning Outcomes:

- Students will effectively communicate with patients.
- Students will construct a functional resume and cover letter.
- Students will communicate effectively using written communication.

Students will demonstrate critical thinking and problem solving skills.

Student Learning Outcomes:

- Students will critique radiographic images and determine corrective action when needed.
- Students will compile an exposure technique chart after creating phantom images.

Students will demonstrate professional and ethical behavior.

Student Learning Outcomes:

- Students will demonstrate professional behavior.
- Student will discuss and model ethical behavior.
- Students will demonstrate willingness to improve by receptivity to correction.

The program will monitor its ongoing effectiveness through graduate and employer satisfaction.

Student Learning Outcomes:

- Students will complete the radiologic technology program.
- Graduates will evaluate the program positively.
- Graduates will pass the ARRT credentialing exam.
- Graduates will be placed in radiography jobs.
- Employers will rate their satisfaction with graduates' skills.
