Radiologic Technology Program

Mission Statement, Goals and Student Learning Outcomes

Program Mission:
To prepare people for success in the healthcare field as competent entry level radiographers.

Program Goals:

Students will be clinically competent.
Student Learning Outcomes:
- Students will accurately position patients for radiographic exams.
- Students will simulate exams for evaluation of continued skill and retention.
- Students will use proper radiation protection during radiographic procedures.

Students will demonstrate effective communication skills.
Student Learning Outcomes:
- Students will effectively communicate with patients.
- Students will construct a functional resume and cover letter.
- Students will communicate effectively using written communication.
- Students will effectively communicate with healthcare professionals.

Students will demonstrate critical thinking and problem solving skills.
Student Learning Outcomes:
- Students will critique radiographic images and determine corrective action when needed.
- Students will critically assess the effect of various factors on the four radiographic qualities.

Students will demonstrate professional and ethical behavior.
Student Learning Outcomes:
- Students will demonstrate professional behavior.
- Students will discuss and model ethical behavior.
- Students will demonstrate willingness to improve by receptivity to correction.

The program will monitor its ongoing effectiveness through graduate and employer satisfaction.
Student Learning Outcomes:
- Students will complete the radiologic technology program.
- Graduates will evaluate the program positively.
- Graduates will pass the ARRT credentialing exam.
- Graduates will be placed in radiography jobs.
- Employers will rate their satisfaction with graduates’ skills.
